**BrainsCAN**  
Transforming brain research.

## KNOWLEDGE MOBILIZATION & IMPACT

At BrainsCAN, knowledge mobilization is at the forefront of our work. Our focus is to understand how our transformative research engages with and impacts clinicians, patients, government, industry and society as a whole. Knowledge mobilization is used to involve end users in the research process and to understand how BrainsCAN research is benefiting all Canadians.

Our strength lies in our ability to identify how this research impacts policy issues, healthcare, business and cultural/environmental concerns for those with brain disorders. We work directly with researchers providing support and expertise to identify and showcase the excellence and impact of their work. Knowledge mobilization ensures we can identify how BrainsCAN research influences change across Canada and around the world.

### COMMUNITY ENGAGEMENT

### INDUSTRY PARTNERSHIP DEVELOPMENT

*Further information on BrainsCAN services can be found at [brainscan.uwo.ca](http://brainscan.uwo.ca)*

*BrainsCAN's knowledge mobilization & impact activities are part of Western's \$66M BrainsCAN initiative, supported by the Canada First Research Excellence Fund (CFREF). BrainsCAN brings together scientists from all disciplines, working across species and levels of analysis, to find effective solutions for maintaining a healthy brain.*
