

# Application to request funding from BrainsCAN, Human Cognition and Sensorimotor Core

Contact Information:	
Principal Investigator:	Email:
Department:	Campus Extension:
Date:	Research Contact:

Please indicate the following
Project Name (short title):
Total Funding Request (quotes and/or budget must be included):
Other funding supporting this research project:
Is this funding urgent (or must be purchased in less than 4 weeks)? YES <input type="checkbox"/> NO <input type="checkbox"/> Date decision needed by:
If this project has a collaborative component, please list the collaborating researchers and their affiliations:

This proposal must be complete and include quotes in order to be reviewed.

If awarded BrainsCAN Human Cognition and Sensorimotor Core support, researchers for each individual project are expected to acknowledge the “Canada First Research Excellence Fund to BrainsCAN” award in all presentations and publications, and to submit a brief report to the CFREF administrative team ([brainscan@uwo.ca](mailto:brainscan@uwo.ca)) by the end of March in every calendar year until the project and all outputs are complete/delivered.

Internal Use Only	
HCScore Committee Approval: Yes <input type="checkbox"/> No <input type="checkbox"/>	Date:

# **Application to request funding from BrainsCAN, Human Cognition and Sensorimotor Core**

Through the Canada First Research Excellence Fund (CFREF) BrainsCAN award, the Human Cognition and Sensorimotor Core can fund equipment, supplies, consumables and software for research in human cognitive neuroscience, as long as the research is aligned with the aims of the CFREF proposal, to “understand how brain networks support our actions, thoughts and emotions and how these become disrupted in disorders that affect humans across the lifespan”.

This form assesses that alignment and will also facilitate reporting to the Human Cognition and Sensorimotor Core committee, BrainsCAN Executive Committee, BrainsCAN Board of Directors and the International Scientific Advisory Board.

Principal Investigators will need to submit a proposal that includes a description of the funding purpose and justification of research work enabled and relevant quotes so that this can be reported. Please submit this completed form to the HCSCore Committee, c/o Denise Soanes at [hcscore@uwo.ca](mailto:hcscore@uwo.ca).

Using no more than the space remaining on this page (~300 words), please describe the research that the requested equipment, consumables or software will enable. Explain benefits and outcomes funding would provide your research in terms of the additional scientific avenues you can pursue.
