

# Physiology and Pharmacology Seminar Series

**Amy Reichelt, PhD**

BrainsCan Tier 1 Research Fellow, Robarts Research Institute,  
Western University

***“Food for thought - How junk foods impact  
learning and memory”***

**Monday, November 12, 2018**

**Medical Sciences Building 384**

**3:30 – 4:30 p.m.**

Also video broadcast to VH rm. A6-103

## ***Learning Objectives:***

- 1) Outline the cognitive impact of junk food diets on memory processes
- 2) Explore adolescence as a neurodevelopmental period of vulnerability to the detrimental cognitive effects of junk foods
- 3) Describe putative neural mechanisms underlying how junk food diets impacts cognition
